MOCHAMMAD FAHREL PUTRA ARDIANSYAH

Indonesia • +62 851-4388-5550 • fahrel02x@gmail.com • linkedin.com/in/fahrelardiansyah • fahrelputra.vercel.app • github.com/zerotrust1

EDUCATION

Universitas Terbuka — Indonesia
Bachelor of Science in Information Systems (S1) — *Expected 2027*

EXPERIENCE

PT Internusa Duta Makmur — Banyuwangi, Indonesia
Network Engineer — *August 2026 – Present*

- Administer enterprise ISP infrastructure across routing, switching, and security zone firewalls, sustaining **99.8%** service uptime.
- Configure and audit **20+** Juniper SRX firewall security policies, NAT rules, and IPsec VPN tunnels, mitigating unauthorized perimeter scan traffic by **45%**.
- Triage **500+ MB** of packet capture files (PCAP) with Wireshark to isolate network anomalies, resolve latency spikes, and neutralize SYN flood attempts.

Independent Bug Bounty — Remote
Security Researcher & Vulnerability Bounty Hunter — *2023 – Present*

- Conducted authorized vulnerability assessments across **10+** municipal web applications and regional Indonesian government platforms.
- Discovered and responsibly disclosed **4** critical security flaws (**2 SQLi**, **2 IDOR**), officially verified and patched by portal administrators.
- Engineered custom reconnaissance and fuzzing scripts in Python and Go, reducing manual attack surface enumeration time by **60%**.
- Authored formal vulnerability reports with reproduction steps, sanitized PoCs, CVSS v3.1 ratings, and remediation guidelines for engineering teams.

PT Transformasi Data Digital (Hostdata.id) — Surakarta / Remote
Systems Administrator & Security Associate — *April 2026 – May 2026*

- Hardened **50+** Linux hosting VPS against automated brute-force attacks, achieving **99.9%** intrusion mitigation via fail2ban, iptables, and SSH key policies.
- Triaged security events under strict **15-minute** SLAs, auditing **10,000+** lines of Linux syslog, auth.log, and Nginx web server access logs.
- Remediated post-compromise client environments by removing malicious PHP/WordPress webshells and enforcing strict directory execution policies.

TECHNICAL PROJECTS

Nocturne – Autonomous Threat Simulation Framework | *Python, AsyncIO, Scapy* — 2026

- Engineered a modular offensive security framework utilizing raw socket manipulation, executing multi-threaded attack simulation payloads.
- Implemented an AST-based exploit syntax validator and asynchronous event loop capable of sub-millisecond execution telemetry logging.

CamouDesk – Stealth Remote Administration Agent | *Go, WebSockets, AES-256-GCM* — 2026

- Built a cross-platform remote telemetry agent in Go with an active footprint under **15 MB RAM** and zero CGO dependencies.
- Secured full-duplex C2 channels using AES-256-GCM authenticated cipher encryption with automated exponential backoff reconnect logic.

CERTIFICATIONS

- **JNCIA-SEC (Juniper Networks Certified Associate - Security)** – Juniper Networks (2026)
- **Google Cybersecurity Professional Certificate** – Google (2025)
- **Junior Cybersecurity Analyst (Path 419)** – Hack The Box Academy (2026)
- **Cisco Network Automation Essentials (DEVNAE) & Network Technician** – Cisco (2026)

TECHNICAL SKILLS

- **Security & Pentesting:** OWASP Top 10 (SQLi, IDOR, XSS, CSRF, SSRF, Auth Bypass), Vulnerability Assessment, Threat Modeling, CVSS v3.1, MITRE ATT&CK;
- **Network Security:** Juniper SRX Gateways, Security Zones, NAT Policies, IPsec VPN, BGP, OSPF, VLANs, Wireshark, Packet Analysis, TCP/IP
- **Security Tools:** Burp Suite Pro, Nmap, Metasploit, SQLmap, Gobuster, Nikto, OWASP ZAP, Wireshark, Kali Linux, Fail2ban, iptables
- **Languages & Systems:** Python (AsyncIO, Scapy), Go (Golang), Bash, Linux Hardening (Ubuntu, Debian), Nginx, Docker, Git
