MOCHAMMAD FAHREL PUTRA ARDIANSYAH

CYBERSECURITY EXPERT | NETWORK SECURITY & OFFENSIVE DEFENSE

Email: fahrel02x@gmail.com • Phone: +62 851-4388-5550 • Location: Banyuwangi, Indonesia (Open to 100% Remote Worldwide / APAC)
Portfolio: fahrelputra.vercel.app • LinkedIn: linkedin.com/in/fahrelardiansyah • GitHub: github.com/zerotrust1

PROFESSIONAL SUMMARY

Cybersecurity Expert & Network Engineer based in Banyuwangi, Indonesia, combining enterprise ISP infrastructure administration at **PT Internusa Duta Makmur** with 5+ years of practical offensive and defensive security research. Certified in **JNCIA-SEC (Juniper Networks)**, **Google Cybersecurity Professional**, **Cisco Network Automation (DEVNAE)**, **Cisco Network Technician**, and **Hack The Box Academy Junior Cybersecurity Analyst (Path 419)**. Demonstrated expertise in enterprise routing, switching, Juniper SRX firewall security zones, NAT policies, IPsec VPNs, and OWASP Top 10 vulnerability assessments. Proven track record in responsible vulnerability disclosure with officially verified critical findings (SQLi, IDOR) on regional government platforms. Hardened 50+ Linux hosting VPS servers at Hostdata.id against automated brute-force intrusion under strict SLAs. Bilingual communicator in technical English with asynchronous remote collaboration and formal security reporting capabilities.

CERTIFICATIONS & VERIFIED CREDENTIALS

- **JNCIA-SEC (Juniper Networks Certified Associate - Security)** — *Juniper Networks | ID: 991865-12052*
  Junos OS Security Architecture, SRX Series Gateways, Security Zones & Screens, Zone-based Security Policies, NAT (Source/Destination/Static), IPsec VPNs (IKEv2), UTM, and Intrusion Detection & Prevention (IDP).
- **Google Cybersecurity Professional Certificate** — *Google • Coursera | 2025*
  Threat & Vulnerability Assessment, SIEM log triage (Splunk/Wazuh), Linux CLI forensics, Python automation, SQL injection discovery, Wireshark packet capture analysis, and Incident Response documentation.
- **Junior Cybersecurity Analyst (Path 419)** — *Hack The Box Academy | 2026*
  SOC triage workflows, perimeter incident handling, network forensics, packet capture inspection, and defensive remediation.
- **Understanding Cisco Network Automation Essentials (DEVNAE)** — *Cisco | Credential: e3f0960b-a518-497d-9311-c32d782c0398*
  Network programmability, REST APIs, JSON data encoding, Python automation scripts, and configuration management.
- **Network Technician Career Path & Networking Basics** — *Cisco | Credential: 2ac73c3f-245c-429c-8d79-553767eea348*
  Enterprise routing and switching, IPv4/IPv6 diagnostic subnetting, packet routing fundamentals, and multi-vendor diagnostic triage.

TECHNICAL SKILLS & DEFENSIVE / OFFENSIVE TOOLKIT

- **Network Security & Architecture:** Enterprise Routing & Switching, Juniper SRX Gateways, Junos OS Policies, Security Zones, NAT44, IPsec VPNs, TCP/IP, VLANs, BGP, OSPF, Wireshark, Packet Capture Analysis
- **Offensive Pentesting & Audit:** OWASP Top 10 (SQLi, IDOR, XSS, CSRF, SSRF, Auth Bypass), Vulnerability Assessment, Attack Surface Mapping, Privilege Escalation, Red Teaming, Sanitized PoC Reproduction
- **Security Tools & Frameworks:** Burp Suite Pro, Metasploit Framework, Nmap, SQLmap, Gobuster, Nikto, OWASP ZAP, Kali Linux, Hashcat, John the Ripper, Hydra, MITRE ATT&CK; Framework
- **Systems & Hardening:** Linux Server Hardening (Ubuntu, Debian), SSH Key Isolation, Fail2ban, iptables Firewall Rules, Linux syslog / auth.log & Nginx Access Log Auditing, Docker
- **Scripting & Tool Development:** Python (AsyncIO, Scapy, custom exploit PoCs, automation parsers), Go / Golang (high-performance CLI security tools), Bash Shell Scripting
- **Reporting & Compliance:** Formal Penetration Test Reports, Responsible Vulnerability Disclosures, CVSS v3.1 Scoring, Developer Remediation Guidelines

PROFESSIONAL & SECURITY EXPERIENCE

Network Engineer • PT Internusa Duta Makmur *August 2026 – Present • Banyuwangi, Indonesia*

- Administrator and monitor enterprise ISP network infrastructure, routing, switching, and firewall security configurations.
- Configure and audit network security policies, Juniper SRX security zones, NAT rules, and IPsec VPN tunnels to maintain perimeter integrity.
- Perform proactive network traffic analysis, bandwidth monitoring, and packet capture triage (Wireshark) to detect anomalies and unauthorized scans.

Security Researcher & Vulnerability Bounty Hunter • Independent Bug Bounty *2023 – Present • Remote / Freelance*

- Conducted authorized vulnerability assessments on municipal web applications and regional Indonesian government platforms.
- Discovered and responsibly disclosed critical vulnerabilities (SQL Injection and IDOR), officially verified and resolved by portal administrators.
- Developed custom reconnaissance and cryptanalysis utilities in Python and Go, decreasing manual target enumeration time by 60%.
- Delivered formal disclosure dossiers featuring comprehensive reproduction steps, sanitized PoCs, CVSS v3.1 ratings, and developer mitigation guidelines.

Systems Administrator & Security Associate • PT Transformasi Data Digital (Hostdata.id) *April 2026 – May 2026 • Surakarta / Remote*

- Hardened 50+ Linux hosting servers against automated brute-force attacks and credential stuffing using fail2ban, iptables, and SSH key policies.
- Triaged anomalous traffic and suspected brute-force attacks by auditing Linux syslog, auth.log, and Nginx web server access logs under strict SLAs.
- Advised hosting clients on post-compromise cleanup and PHP/WordPress backdoor mitigation following unauthorized intrusions.

FEATURED SECURITY ENGINEERING PROJECTS

Nocturne • Autonomous Threat Simulation & Offensive Security Framework (Python, AsyncIO, Scapy)
Developed a modular autonomous security testing framework utilizing low-level raw socket packet crafting, asynchronous non-blocking event loops, dynamic AST exploit syntax parsing, and real-time execution telemetry.

CamouDesk • Stealth Cross-Platform Remote Administration & Telemetry Agent (Go, WebSockets, AES-256-GCM)
Engineered a high-performance cross-platform agent featuring end-to-end encrypted C2 communication (AES-256-GCM), persistent full-duplex WebSockets, in-memory payload execution, and zero-CGO compilation under 15MB RAM footprint.

EDUCATION

Bachelor of Information Systems (S1) • Universitas Terbuka *Ongoing • Indonesia (Flexible Distance Learning)*
