EDUCATION

Bachelor of Science in Information Systems (S1) Expected 2029

EXPERIENCE

PT Internusa Duta Makmur Banyuwangi, Indonesia

Network Engineer *August 2026 – Present*

- Administer enterprise carrier-grade ISP infrastructure across **Juniper MX204**, **Huawei S6730**, and **MikroTik CCR2116** routers, sustaining **99.99%** regional uptime across 100GE fiber rings via OSPF Area 0, BFD sub-50ms convergence, and MPLS L2VC circuits.
- Configure upstream BGP peering policies, Juniper DFZ export prefix-list filters, and stateful firewall policers, eliminating inter-POP asymmetric routing blackholes and mitigating volumetric DDoS/SYN floods across **10+ Gbps** uplinks.
- Automate network monitoring and telemetry triage across **150+** core devices using Python REST APIs and PRTG, deploying WireGuard administrative overlays and **fq_codel** AQM to reduce customer latency jitter by **35%**.
- Triage network packet captures (PCAP) with Wireshark to dissect TCP/IP anomalies, isolate routing loops, and audit perimeter firewall access rules.

PT Transformasi Data Digital (Hostdata.id) Surakarta / Remote

Systems Administrator & Security Associate *April 2026 – May 2026*

- Hardened **50+** Linux hosting production servers against remote exploits and automated brute-force attacks by enforcing CIS-aligned iptables firewalling, fail2ban rate-limiting, and SSH key authentication.
- Triaged security incident alerts and customer support tickets under strict **15-minute** SLAs, analyzing Linux auth.log, syslog, and Nginx web server access logs to isolate anomalous traffic spikes.
- Remediated post-compromise client environments by dissecting and eradicating malicious PHP/WordPress webshells, backdoors, and enforcing strict directory execution permissions.

TECHNICAL PROJECTS

Nocturne – AI Network Operations Center (NOC) Monitoring System | *Python, BGP/OSPF* 2026

- Engineered an automated NOC monitoring system for ISPs, analyzing real-time BGP/OSPF route state anomalies, fiber cut telemetry, and network alert streams in Python.
- Implemented asynchronous incident summarization and alert escalation pipelines, reducing on-call network engineer triage response time by **50%**.

Cipher Identifier – Automated Cryptanalysis & Detection Utility | *Next.js, TypeScript* 2026

- Developed an automated cryptanalysis web utility capable of analyzing and decoding **10+** classical ciphers and encodings using statistical English frequency scoring algorithms.
- Designed a responsive real-time UI allowing security analysts and CTF players to de-obfuscate payload strings with instantaneous confidence scoring.

CTF Vulnerability Research & Exploit Archive | *Python, Pwntools, Z3, Ghidra* 2026

- Solved and published technical analysis for **26** advanced security challenges in Hidden Investigations CTF 2026, documenting exploit chains across web exploitation, cryptography, and reverse engineering.
- Developed automated exploit scripts and constraint solvers in Python (Pwntools, Scapy) and Z3 SMT solver, open-sourcing research on GitHub (**zerotrust1/ctf-writeup**).

CERTIFICATIONS

- **JNCIA-SEC (Juniper Networks Certified Associate - Security)** – Juniper Networks (2026)
- **Junior Cybersecurity Analyst (Path 419)** – Hack The Box Academy (2026)
- **Google Cybersecurity Professional Certificate** – Google (2025)
- **Cisco Network Automation Essentials (DEVNAE) & Network Technician** – Cisco (2026)

TECHNICAL SKILLS

• **Offensive Security & Pentesting:** OWASP Top 10 (SQLi, IDOR, SSRF, XSS, Broken Access Control, CSRF), Web App Pentesting, Threat Modeling, CVSS v3.1, NIST SP 800-115, MITRE ATT&CK;

• **Network Engineering & Security:** Juniper SRX/MX (Junos), Huawei VRP, MikroTik RouterOS v7, BGP DFZ Peering, MPLS L2VC, OSPF Area 0, BFD, WireGuard / IPsec VPN, Wireshark, TCP/IP

• **Security & Pentesting Tools:** Burp Suite Pro, Nmap, Metasploit, SQLmap, Gobuster, Nikto, Wireshark, Kali Linux, Pwntools, Z3 Solver, Fail2ban, iptables, Docker

• **Languages & Automation:** Python (Scapy, AsyncIO, Requests, Pwntools), Go (Golang), Bash, Next.js, TypeScript, Linux Administration & Hardening (Ubuntu, Debian), Git
